BRIAN MACHOKA MWAMBA

Software Developer · IT Systems Specialist · Web Applications Engineer

📍 Nakuru, Kenya 📞 +254 716 635 052 ✉ machokabrian0@gmail.com | GitHub | pembahardware.com | Portfolio

✅ *Available for Full-Time, Contract & Remote Roles · Open to Relocation within Kenya*

3+	4 Months	Full-Stack
Live Deployed Projects	Supreme Court IT Attachment	PHP · Python · MySQL · JS

PROFESSIONAL SUMMARY

Results-driven Software Developer with demonstrated ability to design, build, and deploy production-ready web applications from scratch. Brings hands-on IT support experience from the Supreme Court of Kenya alongside three live portfolio projects — including a fully operational e-commerce and inventory management system. Proficient across the full development stack: PHP (Laravel), Python (Django), MySQL, and JavaScript. Equally comfortable configuring server environments, diagnosing network issues, and writing clean, maintainable code. Committed to delivering solutions that are reliable, scalable, and user-focused.

CORE COMPETENCIES

Full-Stack Web Dev	Database Design	IT Helpdesk Support
System Administration	Network Troubleshooting	Agile Problem-Solving
cPanel & Web Hosting	Version Control (Git)	REST API Integration

EDUCATION

Diploma in Software Engineering
Feb 2021 – Nov 2023

Zetech University, Thika Road Campus — Nairobi, Kenya

- Relevant Coursework: Web Development, Database Systems, Computer Networking, OOP, System Analysis & Design, Cybersecurity Fundamentals
- Capstone Project: Designed and built an Online Employee Selection & Hiring System with automated candidate scoring — received distinction-level feedback
- Active member of the university tech club; participated in peer-led coding workshops

PROFESSIONAL EXPERIENCE

IT Technician — Industrial Attachment
Sep 2023 – Dec 2023

Supreme Court of Kenya, Nairobi

- Provided Tier-1 & Tier-2 IT helpdesk support for 100+ judges, staff and administrative personnel — resolving hardware, software, printer and LAN issues daily
- Deployed and configured 15+ new workstations: OS installation (Windows 10/11), software setup, network registration and user account creation
- Assisted in deployment and ongoing maintenance of internal PHP web applications relied on court-wide for case management

- Executed scheduled server monitoring, automated backup jobs, and assisted with data recovery procedures for critical court records
- Compiled and maintained IT asset inventory and documented SOPs — improving onboarding efficiency for incoming attachment students

PROJECTS & PORTFOLIO

1. PembaHardware.com — Hardware Shop Management System 🔗 View Live

- Sole developer: architected database schema, built all backend logic, and designed a fully responsive Bootstrap front end
- Key Features: product catalogue, real-time stock tracking, sales recording, customer management, secure admin dashboard
- Tech Stack: PHP, MySQL, Bootstrap 5, JavaScript — live on HostPinnacle (cPanel shared hosting)
- Business Impact: enables the hardware shop to manage hundreds of SKUs digitally, replacing manual paper-based stock tracking

2. Online Employee Selection & Hiring System 🔗 GitHub Repo

- Built a full-cycle recruitment automation platform: job posting ’n online application ’n automated scoring ’n admin shortlist ’n interview scheduling
- Rule-based scoring engine reduces HR manual review time significantly for each hiring round
- Tech Stack: PHP, MySQL, JavaScript, Bootstrap

3. Personal Developer Portfolio 🔗 View Live

- Responsive, mobile-first portfolio showcasing projects, technical skills, and a functional PHP contact form with email notification
- Tech Stack: HTML5, CSS3, vanilla JavaScript, PHP — deployed via Netlify with continuous deployment

TECHNICAL SKILLS

Languages	PHP (Laravel) · Python (Django) · JavaScript (ES6+) · HTML5 · CSS3
Databases	MySQL · SQLite — schema design, query optimisation, indexing, stored procedures
Frameworks	Laravel · Django · Bootstrap 5
APIs & Integration	RESTful API design & consumption · JSON · form-to-email handlers
DevOps & Tools	Git & GitHub · Docker (basic) · XAMPP · VS Code · cPanel · phpMyAdmin
Web Deployment	cPanel shared hosting (HostPinnacle) · Netlify · domain & DNS configuration
IT Support	Hardware diagnosis & repair · Windows 10/11 · Ubuntu/Linux CLI · workstation setup
Networking	TCP/IP · LAN/WAN · Wireshark · ping/traceroute · basic router/switch config
Soft Skills	Problem-solving · Self-directed learning · Attention to detail · Team collaboration

CERTIFICATIONS & PROFESSIONAL DEVELOPMENT

- Cisco CyberOps Associate — Security monitoring, threat analysis, incident response, network intrusion detection (Cisco Networking Academy)
- Ongoing: Self-study in Laravel advanced features, Docker containerisation, and AWS Cloud Practitioner preparation

LANGUAGES

English — Professional Working Proficiency | **Kiswahili** — Native / Full Professional Proficiency
